Posadas, Daniel C.

PRACTICE TASK 3.

1. Logical - IF

Exercise

Write a formula using IF. Salary for an AVP will be $2,000 and for an analyst will be $1,000

Emp ID	Designation	Salary	Formula
E001	AVP	$2,000	=IF(B34="AVP",2000,1000)
E002	Analyst	$1,000	=IF(B35="AVP",2000,1000)
E003	Analyst	$1,000	=IF(B36="AVP",2000,1000)
E004	Analyst	$1,000	=IF(B37="AVP",2000,1000)

2. Logical - AND

Exercise

Write a formula using AND with IF to find if an employee should get a "GOOD" increment or not. Sales made by the employee should be more than 5
should have adhered to all HR policies

Emp ID	Designation	Sales	Adhered to HR Policies	GOOD Increment (Yes or NO)	Formula
E001	AVP	51	YES	YES	=IF(AND(C36>50,D36="YES"),"YES","NO")
E002	Analyst	100	NO	NO	=IF(AND(C37>50,D37="YES"),"YES","NO")
E003	Analyst	49	YES	NO	=IF(AND(C38>50,D38="YES"),"YES","NO")
E004	Analyst	75	YES	YES	=IF(AND(C39>50,D39="YES"),"YES","NO")

3. Logical - Nested IFs

Exercise

Write a formula using Nested IF conditions to check what level increment an employee should get and then convert the amount into dollars using Format

TABLE A	
Performance	Increment
A	$1,000
B	$500
C	$250

TABLE B				
Emp ID	Designation	Performance	Result	Formula
E001	AVP	A	$1,000	=IF(F36="A",1000,IF(F36="B",500,250))
E002	Analyst	A	$1,000	=IF(F37="A",1000,IF(F37="B",500,250))
E003	Analyst	B	$500	=IF(F38="A",1000,IF(F38="B",500,250))
E004	Analyst	C	$250	=IF(F39="A",1000,IF(F39="B",500,250))

4. Logical - OR

Exercise

Write a formula using OR with IF to find if an employee should get a "GOOD" increment or not. Either Sales made by the employee should be more than have adhered to all HR policies

Emp ID	Designation	Sales	Adhered to HR Policies	GOOD Increment (Yes or NO)	Formula
E001	AVP	**51**	**YES**	YES	=IF(OR(C38>50,D38="YES"),"YES","NO")
E002	Analyst	**49**	**NO**	NO	=IF(OR(C39>50,D39="YES"),"YES","NO")
E003	Analyst	**49**	**YES**	YES	=IF(OR(C40>50,D40="YES"),"YES","NO")
E004	Analyst	**75**	**YES**	YES	=IF(OR(C41>50,D41="YES"),"YES","NO")

5. Logical - IFERROR

Exercise

Write a formula using IFERROR. Find the monthly salary of each employee using data in Column C and if an error appears, then change it to ERROR IN SALARY. Change the format to £ (Pounds) and no decimal places

Emp ID	Designation	Annual Salary	Monthly Salary	Formula
E001	AVP	**£80,000**	**£6,667**	=IFERROR(C39/12, "ERROR")
E002	Analyst	**£50,000**	**£4,167**	=IFERROR(C40/12, "ERROR")
E003	Analyst	**abcd**	**ERROR**	=IFERROR(C41/12, "ERROR")
E004	Analyst	**£40,000**	**£3,333**	=IFERROR(C42/12, "ERROR")

6. Text - EXACT

Exercise

Write a formula using EXACT to check if the values in Col A and Col B are same or not

Col A	Col B	Results	Formula
TEST	Test	**FALSE**	=EXACT(A29,B29)
TEST	TEST	**TRUE**	=EXACT(A30,B30)
1234	1234	**TRUE**	=EXACT(A31,B31)
1.1	1.101	**FALSE**	=EXACT(A32,B32)

7. LEN

Exercise 1

Find the length of the followig strings

Text	Formula	
Phone Number is +(0)1234	**24**	=LEN(A24)
This is used for data cleaning	**30**	=LEN(A25)

Bognot, Arnold Kirk M. **7ANALYTICS**
Posadas, Daniel C.

8. Text - LOWER

Exercise 2

Use LOWER to change Col A and then use EXACT function to match the 2 strings to see if they are same or not

Col A	Col B	Result	
MATCH	match	TRUE	=EXACT(LOWER(A28), B28)
MATCH	mATCH	FALSE	=EXACT(LOWER(A29), B29)
CORECT	correct	FALSE	=EXACT(LOWER(A30), B30)

9. Text - UPPER

Exercise 2

Use UPPER to change Col A and then use EXACT function to match the 2 strings to see if they are same or not

Col A	Col B	Result	
match	MATCH	TRUE	=EXACT(UPPER(A28),(B28))
match	Match	FALSE	=EXACT(UPPER(A29),(B29))
correct	CORECT	FALSE	=EXACT(UPPER(A30),(B30))

10. Text - VALUE

Exercise

Convert the values in Text column into numbers

Text	Result	Formula	
$123.17	**123**	**123.17**	=VALUE(A22)
01/12/2017	**43070**	**43070**	=VALUE(A23)
12/01/2017	**42747**	**42747**	=VALUE(A24)

11. Text - CONCATENATE

Exercise

Join the 3 strings together using CONCATENATE and & (ampersand) operator to get the results as mentioned in the result column

String1	String2	String3	Result	USE		Formula
E001	AVP	800	**E001-AVP-800**	CONCATENATE	**E001-AVP-800**	=CONCATENATE(A35,"-",B35,"-",C35)
E002	Analyst	500	**E002Analyst500**	CONCATENATE	**E002Analyst500**	=CONCATENATE(A36,B36,C36)
E003	Analyst	100	**E003/Analyst-100**	CONCATENATE	**E003/Analyst-100**	=CONCATENATE(A37,"/",B37,"-",C37)
E004	Analyst	400	**E004:Analyst:400**	&	**E004:Analyst:400**	=A38&":"&B38&":"&C38
E005	AVP	1000	**E005 AVP 1000**	&	**E005 AVP 1000**	=A39&" "&B39&" "&C39
E006	Analyst	250	**E006 Analyst 250**	&	**E006 Analyst 250**	=A40&" "&B40&" "&C40
E007	Analyst	500	**E007;Analyst*500**	&	**E007;Analyst*500**	=A41&";"&B41&"*"&C41

Bognot, Arnold Kirk M. **7ANALYTICS**
Posadas, Daniel C.

12. Text - TEXT

31 **Exercise**

32 Write a formula using EXACT to check if the values in Col A and Col B are same or not

	Value	Convert To	Results	
34	21/05/2017	21/05/2017	**TRUE**	=EXACT(A34,B34)
35	42876	21/05/2017	**TRUE**	=EXACT(A35,B35)
36	12:00	12:00	**TRUE**	=EXACT(A36,B36)
37	12345.78	£12,345.78	**TRUE**	=EXACT(A37,B37)
38	12345.78	£12,346	**FALSE**	=EXACT(A38,B38)
